REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, ores and crude metals, such as copper, lead, and zinc, which were entered into bonded smelting and refining warehouses, are included when the finished products is withdrawn for consumption or for exportation. Commodities such as wheat and petroleum transferred from bonded storage warehsouses to bonded manufacturing warehouses for further processing and subsequent withdrawl for exportation are also included.

The ststistics in this report, as well as in other reports on United States imports, covers shipments by rail, truck, air, parcel post, pipeline, etc., and all vessels including Army and Navy operated vessels. Reports FT 972, 973, 303 and other vessel shipping reports presenting import data exclude information on imports carried on Army-and-Navy-operated vessels (See Reports FT 972, 973, and 303 for a more complete description.)

Shipments between the United States and its territories and possessions are not included in this report or in the vessel reports listed above but are presented separately in Report No. FT 800.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword of the latest edition of Foreign Commerce and Navigation of the United States. Copies of the Foreword are obtainable upon request.

Commodity description and country names are abbreviated in this report where space does not permit complete description. The omission of a commodity classification or country name from this report (except as indicated below) indicates no transactions for that commodity or country. See Schedule A, Statisticak Classification of Imports into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C, showing the countries, adjacent provinces, territories, and islands included under each country designation is also available free upon request. To save printing costs in the monthly issues of this report (but not in the annual issues) imports of a commodity from countries where the imports are less than $10,000 are combined in a total identified as "0th Cty" unless imports of a commodity are less than $10,000 for each country. If imports of a commodity are less than $10,000 for each country an asterisk is shown opposite the commodity total. Information on imports for each country included in the "Ith Cty" or commodity totals shown with an asterisk appearing in the monthly reports will be supplied on request. A charge may be made to cover the cost of preparing this detailed information.

Price: Annual subscription (including annual and monthly issues)..... $3.00
Monthly issues, each..... 0.30

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.).

A catalog of United States Foreign Trade Statistical Publications listing reports available on a free and paid basis is available free upon request to the Bureau of the Census.

Data in this report are available for reference purposes prior to the publication of the report. (Further information may be obtained from the Bureau of the Census).

IMPORT STATISTICS
William C. George

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn forexportation.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, ores and crude metals, such as copper, lead, and zinc, which were entered into bonded smelting and refining warehouses, are included when the finished products is withdrawn for consumption or for exportation. Commodities such as wheat and petroleum transferred from bonded storage warehsouses to bonded manufacturing warehouses for further processing and subsequent withdrawl for exportation are also included.

The ststistics in this report, as well as in other reports on United States imports, covers shipments by rail, truck, air, parcel post, pipeline, etc., and all vessels including Army and Navy operated vessels. Reports FT 972, 973, 303 and other vessel shipping reports presenting import data exclude information on imports carried on Army-and-Navy-operated vessels (See Reports FT 972, 973, and 303 for a more complete description.)

Shipments between the United States and its territories and possessions are not included in this report or in the vessel reports listed above but are presented separately in Report No. FT 800.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword of the latest edition of Foreign Commerce and Navigation of the United States. Copies of the Foreword are obtainable upon request.

Commodity description and country names are abbreviated in this report where space does not permit complete description. The omission of a commodity classification or country name from this report (except as indicated below) indicates no transactions for that commodity or country. See Schedule A, Statisticak Classification of Imports into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C, showing the countries, adjacent provinces, territories, and islands included under each country designation is also available free upon request. To save printing costs in the monthly issues of this report (but not in the annual issues) imports of a commodity from countries where the imports are less than $10,000 are combined in a total identified as "Oth Cty" unless imports of a commodity are less than $10,000 for each country. If imports of a commodity are less than $10,000 for each country an asterisk is shown opposite the commodity total. Information on imports for each country included in the "Ith Cty" or commodity totals shown with an asterisk appearing in the monthly reports will be supplied on request. A charge may be made to cover the cost of preparing this detailed information.

Price: Annual subscription (including annual and monthly issues)..... $3.00
Monthly issues, each..... 0.30

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.).

A catalog of United States Foreign Trade Statistical Publications listing reports available on a free and paid basis is available free upon request to the Bureau of the Census.

Data in this report are available for reference purposes prior to the publication of the report. (Further information may be obtained from the Bureau of the Census).

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, ores and crude metals, such as copper, lead, and zinc, which were entered into bonded smelting and refining warehouses, are included when the finished products is withdrawn for consumption or for exportation. Commodities such as wheat and petroleum transferred from bonded storage warehsouses to bonded manufacturing warehouses for further processing and subsequent withdrawl for exportation are also included.

The ststistics in this report, as well as in other reports on United States imports, covers shipments by rail, truck, air, parcel post, pipeline, etc., and all vessels including Army and Navy operated vessels. Reports FT 972, 973, 303 and other vessel shipping reports presenting import data exclude information on imports carried on Army-and-Navy-operated vessels (See Reports FT 972, 973, and 303 for a more complete description.)

Shipments between the United States and its territories and possessions are not included in this report or in the vessel reports listed above but are presented separately in Report No. FT 800.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword of the latest edition of Foreign Commerce and Navigation of the United States. Copies of the Foreword are obtainable upon request.

Commodity description and country names are abbreviated in this report where space does not permit complete description. The omission of a commodity classification or country name from this report (except as indicated below) indicates no transactions for that commodity or country. See Schedule A, Statisticak Classification of Imports into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C, showing the countries, adjacent provinces, territories, and islands included under each country designation is also available free upon request. To save printing costs in the monthly issues of this report (but not in the annual issues) imports of a commodity from countries where the imports are less than $10,000 are combined in a total identified as "0th Cty" unless imports of a commodity are less than $10,000 for each country. If imports of a commodity are less than $10,000 for each country an asterisk is shown opposite the commodity total. Information on imports for each country included in the "Ith Cty" or commodity totals shown with an asterisk appearing in the monthly reports will be supplied on request. A charge may be made to cover the cost of preparing this detailed information.

Price: Annual subscription (including annual and monthly issues)..... $3.00
Monthly issues, each..... 0.30

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.).

A catalog of United States Foreign Trade Statistical Publications listing reports available on a free and paid basis is available free upon request to the Bureau of the Census.

Data in this report are available for reference purposes prior to the publication of the report. (Further information may be obtained from the Bureau of the Census).

IMPORT STATISTICS
William C. George

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, ores and crude metals, such as copper, lead, and zinc, which were entered into bonded smelting and refining warehouses, are included when the finished products is withdrawn for consumption or for exportation. Commodities such as wheat and petroleum transferred from bonded storage warehsouses to bonded manufacturing warehouses for further processing and subsequent withdrawl for exportation are also included.

The ststistics in this report, as well as in other reports on United States imports, covers shipments by rail, truck, air, parcel post, pipeline, etc., and all vessels including Army and Navy operated vessels. Reports FT 972, 973, 303 and other vessel shipping reports presenting import data exclude information on imports carried on Army-and-Navy-operated vessels (See Reports FT 972, 973, and 303 for a more complete description.)

Shipments between the United States and its territories and possessions are not included in this report or in the vessel reports listed above but are presented separately in Report No. FT 800.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword of the latest edition of Foreign Commerce and Navigation of the United States. Copies of the Foreword are obtainable upon request.

Commodity description and country names are abbreviated in this report where space does not permit complete description. The omission of a commodity classification or country name from this report (except as indicated below) indicates no transactions for that commodity or country. See Schedule A, Statisticak Classification of Imports into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C, showing the countries, adjacent provinces, territories, and islands included under each country designation is also available free upon request. To save printing costs in the monthly issues of this report (but not in the annual issues) imports of a commodity from countries where the imports are less than $10,000 are combined in a total identified as "0th Cty" unless imports of a commodity are less than $10,000 for each country. If imports of a commodity are less than $10,000 for each country an asterisk is shown opposite the commodity total. Information on imports for each country included in the "Ith Cty" or commodity totals shown with an asterisk appearing in the monthly reports will be supplied on request. A charge may be made to cover the cost of preparing this detailed information.

Price: Annual subscription (including annual and monthly issues)..... $3.00
Monthly issues, each..... 0.30

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.).

A catalog of United States Foreign Trade Statistical Publications listing reports available on a free and paid basis is available free upon request to the Bureau of the Census.

Data in this report are available for reference purposes prior to the publication of the report. (Further information may be obtained from the Bureau of the Census).

IMPORT STATISTICS
William C. George

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn forexportation.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, ores and crude metals, such as copper, lead, and zinc, which were entered into bonded smelting and refining warehouses, are included when the finished products is withdrawn for consumption or for exportation. Commodities such as wheat and petroleum transferred from bonded storage warehsouses to bonded manufacturing warehouses for further processing and subsequent withdrawl for exportation are also included.

The ststistics in this report, as well as in other reports on United States imports, covers shipments by rail, truck, air, parcel post, pipeline, etc., and all vessels including Army and Navy operated vessels. Reports FT 972, 973, 303 and other vessel shipping reports presenting import data exclude information on imports carried on Army-and-Navy-operated vessels (See Reports FT 972, 973, and 303 for a more complete description.)

Shipments between the United States and its territories and possessions are not included in this report or in the vessel reports listed above but are presented separately in Report No. FT 800.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword of the latest edition of Foreign Commerce and Navigation of the United States. Copies of the Foreword are obtainable upon request.

Commodity description and country names are abbreviated in this report where space does not permit complete description. The omission of a commodity classification or country name from this report (except as indicated below) indicates no transactions for that commodity or country. See Schedule A, Statisticak Classification of Imports into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C, showing the countries, adjacent provinces, territories, and islands included under each country designation is also available free upon request. To save printing costs in the monthly issues of this report (but not in the annual issues) imports of a commodity from countries where the imports are less than $10,000 are combined in a total identified as "0th Cty" unless imports of a commodity are less than $10,000 for each country. If imports of a commodity are less than $10,000 for each country an asterisk is shown opposite the commodity total. Information on imports for each country included in the "1th Cty" or commodity totals shown with an asterisk appearing in the monthly reports will be supplied on request. A charge may be made to cover the cost of preparing this detailed information.

Price: Annual subscription (including annual and monthly issues)..... $3.00
Monthly issues, each..... 0.30

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.).

A catalog of United States Foreign Trade Statistical Publications listing reports available on a free and paid basis is available free upon request to the Bureau of the Census.

Data in this report are available for reference purposes prior to the publication of the report. (Further information may be obtained from the Bureau of the Census).
